

SUMIT SONAWANE

Full Stack Developer | React.js & Node.js | MERN Stack

Nashik, Maharashtra, India | +91-9423749105 | sumitrs2711@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Full Stack Developer with 2+ years of experience building responsive, production-grade web applications using React.js, Next.js, Node.js, and TypeScript, including RESTful APIs, admin dashboards, and interactive data-driven interfaces. Skilled in JWT/OAuth-based authentication and authorization, with working experience in Docker and CI/CD pipelines for streamlined builds and deployments. Comfortable translating complex requirements from cross-functional and non-technical stakeholders into clean, maintainable UI and backend logic, and quick to pick up new frameworks and tools to accelerate delivery of MVPs and demos. Experienced with Agile/Scrum delivery, code reviews, and AI-assisted development workflows (ChatGPT, Cursor, Claude, GitHub Copilot).

PROFESSIONAL EXPERIENCE

Software Engineer | Rwaltz Software, Nashik *Nov 2025 – Present*

- Built and maintained 30+ production-ready RESTful APIs using Node.js, AdonisJS, and TypeScript, covering JWT and OAuth-based authentication, role-based access control (RBAC), reporting, and third-party webhook integrations.
- Built a RBAC-enabled React.js admin dashboard consuming these APIs, translating business and permissioning requirements into an intuitive frontend for non-technical stakeholders.
- Containerized services with Docker and contributed to CI/CD pipelines to streamline build, test, and deployment for the team.
- Improved React.js application performance by reducing unnecessary re-renders, implementing lazy loading, and optimizing component rendering for faster page loads.
- Optimized MongoDB and MySQL queries by adding indexes and minimizing redundant database calls to improve API response times.
- Adopted AI-assisted development workflows to accelerate prototyping, cutting initial feature development time by roughly 15-20%.
- Collaborated with a team of 3-5 engineers in Agile sprints, contributing to architecture decisions, code reviews, and live production system maintenance.

Full Stack Web Developer | SINSS Digital, Nashik *Feb 2025 – Oct 2025*

- Built and deployed 6+ SEO-friendly, mobile-first web applications using React.js and Next.js, optimizing Core Web Vitals through image optimization, code splitting, lazy loading, and browser caching.
- Developed and customized 10+ fully responsive web applications using React.js and Next.js, iterating quickly with clients from concept to launch.
- Implemented on-page SEO best practices including semantic HTML, structured data (Schema.org), and clean URL structures.

MERN Stack Developer | Paarsh Infotech Pvt. Ltd., Nashik *Jul 2024 – Jan 2025*

- Developed a full-stack eLearning platform using React.js, Node.js, Express.js, and MySQL, implementing end-to-end application functionality.
- Built and integrated RESTful APIs, user authentication, and CRUD operations for seamless frontend-backend communication.
- Developed reusable React.js components, managed application state with Redux, and implemented data validation using Zod.
- Deployed the frontend and backend to a VPS and improved performance through code splitting, lazy loading, and image optimization.

RELEVANT PROJECTS

EDMS – Enterprise Secure Document Management System | *Node.js, AdonisJS, React.js, PostgreSQL, Redis*

- Designing a multi-layered document security system combining RBAC, ABAC, and ACL to control access by role, department, classification, and time-bound sharing — translating complex permission logic into a usable admin interface.
- Implementing guest access via OTP-verified secure links, watermarked document previews, and audit-logged access decisions for full traceability.

Rwaltz Web Platform | *React.js, AdonisJS, MySQL, TypeScript*

- Developed a production-ready enterprise platform featuring a secure AdonisJS API, an RBAC-enabled React admin dashboard, and a SEO-optimized corporate website.
- Implemented role-based authentication and fine-grained permission management; built CRUD APIs for projects, blogs, case studies, and enquiries.

PetExpress | *React.js, Redux, AdonisJS, MySQL, TypeScript*

- Developed a scalable multi-portal SaaS platform with secure AdonisJS APIs, a loyalty and rewards engine, and role-based authentication for Admin, Partner, and Pet Parent portals.
- Implemented JWT-based authentication and OAuth login across Admin, Partner, and Pet Parent portals, with role-based access control (RBAC) enforced via middleware to restrict routes and data by portal type.
- Integrated AdonisJS Transmit for real-time client-to-server communication, powering live notifications for loyalty point updates, bookings, and partner activity across the platform.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript

Frontend: React.js, Next.js, Redux, Context API, HTML5, CSS3, Tailwind CSS, Shadcn UI

Backend / APIs: Node.js, Express.js, AdonisJS, RESTful APIs, Authentication (JWT, OAuth), RBAC, ABAC, Event-Driven Architecture

Databases: MongoDB, MySQL, Redis, Sequelize, Mongoose

Cloud & DevOps: Docker, CI/CD Pipelines, Git, GitHub, GitLab

Practices: Agile/Scrum, Code Reviews

AI Tools: ChatGPT, Cursor, GitHub Copilot, Claude.ai

EDUCATION

Bachelor of Engineering (B.E.) – Electronics and Telecommunication Engineering

Savitribai Phule Pune University (SPPU) | CGPA: 7.66 | 08/2021 – 06/2024

KK Wagh Institute of Engineering Education and Research, Nashik, Maharashtra

LANGUAGES

English, Hindi, Marathi
